

Test Plan – MS Teams Meeting

Test Plan Identifier

- teams_meeting_tp_001

Introduction

- Validate meeting functionality after user login in Microsoft Teams

Test Items

- Start meeting button
- Join meeting option
- Meeting link / code
- Audio (mic) control
- Video (camera) control
- Screen sharing
- Chat during meeting
- Participants list
- Mute / Unmute
- Hand raise option
- Reactions (like, clap, emoji)
- Background effects / blur
- Recording option
- Leave meeting

Features to be Tested

- User can start a meeting successfully
- User can join meeting using link or code
- Audio and video work properly
- Mute and unmute functionality works
- Camera on/off works
- Screen sharing works correctly
- Chat messages can be sent and received

- Participants list updates correctly
- Hand raise option works and is visible
- Reactions are sent and visible to all users
- Background effects apply correctly
- Recording starts and stops properly
- User can leave meeting properly
- Multiple users can join meeting
- Meeting works on different devices

Features NOT to be Tested

- User registration
- Login functionality
- Backend server configuration

Approach

- Black box testing
- Manual testing for audio/video features
- Automation (limited for UI using Selenium)

Item Pass / Fail Criteria

- Total test cases 100
- Pass 72
- Fail 28

Suspension Criteria and Resumption Requirements

- Suspension criteria
 - Meeting not starting
 - Audio or video not working
 - Reactions or hand raise not working
 - App crash
 - Network/server failure
- Suspension date

- To be decided
- Resumption criteria
 - Issues fixed
 - System stable
- Resumption date
 - After fix

Test Deliverables

- Test plan
- Test cases
- Test report
- Bug report
- Test summary report
- Test analysis report

Environmental Needs

- Software
 - Windows / Mac OS
 - Microsoft Teams app or browser
- Hardware
 - System with webcam and microphone
 - Headphones / speakers
 - Stable internet

Responsibilities

- Rahul tester meeting testing
- Amit automation
- QA lead review
- Dev team bug fixing

Staffing and Training Needs

- Minimum 2 testers

- Maximum 5 testers
- Basic knowledge of Teams and testing

Schedule

- Planning day 1 to 2
- Test case design day 3 to 5
- Execution day 6 to 12
- Bug fixing day 13 to 18
- Final report day 19 to 20

Risks and Contingencies

- Risk network issue
 - Contingency use stable internet
- Risk audio/video failure
 - Contingency check device and drivers
- Risk feature delay (hand raise/reactions not syncing)
 - Contingency refresh or rejoin meeting
- Risk server down
 - Contingency retry later

Approvals

- QA manager
